Competitive Programming Profiles: [Codeforces \(Max: 1601\)](#) • [CodeChef \(Max: 1829\)](#) • [LeetCode \(2228\)](#)

INTRODUCTION

Competitive Programmer & Systems-focused Developer specialized in performance-critical C++, leveraging a 1,700+ problem-solving foundation and strong CS Fundamentals to architect resource-efficient, hardware-aware software.

EDUCATION

International Institute of Information Technology, Naya Raipur
Bachelor of Technology in Computer Science Engineering (CGPA: 8.56)

Naya Raipur, India
2023 – 2027 (Expected)

TECHNICAL SKILLS

- **Languages:** C++, C, Python, JavaScript, SQL
- **Web & Backend:** FastAPI, Express.js, PostgreSQL, MongoDB, Redis, WebSockets
- **Tools & DevOps:** AWS (EC2, S3, RDS, Lambda, VPC), Nginx, k6, Grafana, Git, CI/CD Pipeline, Supabase
- **Frontend Development:** React.js, Tailwind CSS
- **Core Concepts:** Data Structures & Algorithms, OOPS, DBMS, OS, Computer Networks, Computer Architecture

EXPERIENCE

Forest Assistance Platform (Govt. of Chhattisgarh)
Full-Stack Developer

Remote
Jan 2025 – Aug 2025

- Reduced processing delays from **days to hours** and enhanced analytics led to a **20-30% reduction in incidents**.
- Developed a secure multi-portal system featuring **application tracking** for users and **stage-wise approvals** with analytics for officials, enforced by a 6-tier Role-Based Access Control (RBAC) architecture.

PROJECTS

High-Concurrency Real-Time Chat Application [Git repo](#)

Present

- **Performance & Scale:** Learning to validate and enhance system scalability by engineering **k6** load-testing scripts to simulate thousands of concurrent connections, and visualizing real-time telemetry in **Grafana**.
- Architected a real-time messaging server using **FastAPI** and **WebSockets**, deployed on an **AWS EC2** instance with an **Nginx reverse proxy** to avoid cold starts of free cloud services and to optimize the usage of limited free EC2 hrs for multiple apps.
- **Tech Stack/Tools:** Python, FastAPI, AWS EC2, Nginx, k6, Grafana, SQLite, WebSockets, CI/CD Pipeline.

Hexagon — Immersive Learning Platform [Git repo](#)

Nov 2025

- Built a next-generation learning platform featuring 3D VR classrooms and real-time student interaction.
- **Impact:** Automated content workflows to generate scripts in **seconds** via GenAI. Also, achieved **less than-50ms** latency for heavy 3D asset retrieval using Redis caching.
- **Tech Stack/Tools:** React, React Three Fiber, Node.js, MongoDB, Socket.IO, Google Gemini API, Redis.

SAAS - Seat Allotment & Admission Management System [Git repo](#)

Apr 2025

- Built a C++ Seat-Allotment engine for the University using advanced **Data Structures** to process multi-level quota logic.
- **Impact:** Handled data of **5,000+ applicants**, reducing manual administrative work by approx. **80%** and eliminating errors.
- **Tech Stack:** C++, Node.js, MongoDB, React.

ACHIEVEMENTS & CODING PROFILE

Competitive Programming

- **Codeforces:** max. 1601 (Expert). Solved 1100+ problems.
- **CodeChef:** max. 1829 (4-Star). **LeetCode:** max. 2228 (Guardian).
- Selected for AlgoUniversity's Accelerator Camp; solved 100+ high-difficulty algorithmic problems.

Contest Performances

- **ACM-ICPC Regional Qualifier (2025):** Secured rank 100/320 teams in ICPC Multi-Site Amritapuri Regionals.; Ranked 625/2248 teams & Institute Rank 2 in Prelims;
- **Codefest IICPC (2025):** Ranked 203/17,000 in Round 1; Ranked 168/200 in Round 2 (IIT Kharagpur).
- **IIT Ropar COD-COM:** Secured 11th place in the onsite final round.
- **NIT Raipur DSA Marathon:** Secured 7th place among 65+ teams.
